

# Jobs at Jacuzzi

Internationally renowned bathroom equipment manufacturers Jacuzzi UK are the latest employers to use the At Work jobs shop on Manchester Road. At Work is working with many local employers to ensure jobs are available to local people and has already helped hundreds into work.

Based on the Euroway Trading Estate Jacuzzi UK employ 700 people on four sites. Three manufacture baths, showers and ceramic products whilst the other is the administrative building for the whole Jacuzzi UK operation.

'We need a range of skills to match the range of jobs we have,' comments Human Resources Manager Joanne Wormald. 'We have already taken on people from the Trident area in our Customer Services section and are looking to find more. We pay a fair days wages for a fair days work and our developing relationship with At Work helps us recruit the right sort of people for the jobs available.'

'We are aiming to give people the best chance of getting the best jobs around,' says Sarah Corrigan, the new manager at the shop based at 558-564 Manchester Road. 'Jacuzzi UK meet candidates at our offices and then provide factory tours so that candidates can see first hand what the work is like.'

'So far the people we have taken on are doing very well and hopefully that will continue' adds Human Resources Administrator Alex Walker.

Gordon Doyle, Process Control Manager, is also pleased to create opportunities for local people. 'What we are looking for is a stable and productive workforce. Working with agencies such as At Work helps us to achieve that.'

**At Work can be contacted on 778899 and is open Monday to Friday.**

## Keep warm, save money and save energy!

This is the coldest time of year and it really shows the energy efficiency gaps in your home.

### What is energy efficiency?

Energy efficiency is about using less energy to achieve the same results. If we can do this, we can help minimise the impact of energy consumption on the environment and save ourselves money at the same time! To help you become more energy efficient this winter Strategic Team Group, who are the main contractors for the Facelift (Plus) project which is improving hundreds of homes in the area, has put together a list of information, hints and tips.

### Here's how you can become more energy efficient and save £100 plus per year... You can become more energy efficient and save yourself money by carrying out any of the following:

- Turn your thermostat down by one degree centigrade and cut heating bills by up to 10% or £25.
- Fill gaps under skirting boards with beading or sealant to stop drafts and cut heating costs by £10 a year.
- Opt for a shower rather than a bath. Save £5 as this uses much less heated water.
- Shut all your curtains at dusk to stop heat escaping through windows - another £10.
- Fit your water tank with a jacket - this could save you £15 a year.
- Always turn lights and appliances off when leaving a room. Waste not, want not!
- Invest in double glazing as this cuts heat loss through windows by 50% - which could save you around £40 a year.
- Defrost your freezer regularly to make sure it runs efficiently - every penny counts.
- Use energy efficient light bulbs - they last 12 times longer than normal bulbs and could save you £7 a year off your bills.

## Grants are available too!

A range of grants are available to help you make energy saving investments. If you would like to find out more, contact the '@ Home in BD5' shop at 556 Manchester Road on 722542.
